CCPA and CPRA — Endpoint Checklist

Checklist

- Minimize personal data on devices using BYOD containers.

- Restrict data sharing from work apps to personal apps.

- Maintain inventory of devices that process personal information.

- Support consumer requests with selective wipe and account removal.

- Apply vendor controls for third-party apps and SDKs on managed devices.

How Codeproof helps

- Android Work Profile and Apple User Enrollment.

- Managed app configuration and Open In controls.

- Selective wipe for fast data access revocation.
